-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

1. This action is responsive to communications: Application filed on 03/18/04.

Allowable Subject Matter

2. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach and/or suggest "a request from a client to perform an action on the object in the data store; sending an extensible markup language request message to an adaptor for processing . . . receiving an extensible markup . . . adheres to the set of generic schemas . . . returning resulting values obtained from the response message to the client", combined with "a row set that represents a nested object . . . wherein a row of the plurality rows includes an and a value.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-6 and 10-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Chawla et al., US# 20040181537.

As per claim 1, Chawla et al. teaches "receiving a request from a client to perform an action on the object in the data store; responsive to receiving the request, sending an extensible markup language request message to an adaptor for processing, wherein the extensible markup language request message adheres to a set of generic schemas" (see paragraph [0066]-[0067] and [0080]) "receiving an extensible markup language response message from the adaptor, wherein the extensible markup language response message adheres to the set of generic schemas; and responsive to receiving the extensible markup language response message, returning resulting values obtained from the response message to the client" (see paragraph [0084] and [0096]).

As per claim 2, Chawla et al. teaches "wherein the action includes one of adding, deleting, getting, listing, updating, and validating the object in the data store" (see paragraph [0009] and [0085]).

As per claim 3, Chawla et al. teaches "wherein the request is formatted independently from a structure of the data store" (see paragraph [0093] and [0129]).

As per claim 4, Chawla et al. teaches "wherein the set of generic schemas includes a plurality of row sets, wherein a row set includes a plurality of rows" (see paragraph [0052]-[0053]).

As per claim 5, Chawla et al. teaches "wherein a row of the plurality of rows represents a record of the object in the data store" (see paragraph [0052]-[0053]).

As per claim 6, Chawla et al. teaches "wherein the row includes a row set that represents a nested object" (see paragraph [0089] and [0129]).

As per claim 10, Chawla et al. teaches "wherein the request message includes a plurality of parameters, filters, and sorts" (see paragraph [0040] and [0097]).

As per claim 11, Chawla et al. teaches "wherein the adaptor processes the request message by generating a query statement from the request message and executing the generated query statement on the data store" (see paragraph [0054], [0093] and [0096]).

As per claim 12, Chawla et al. teaches "wherein the request message, the response message, and the set of generic schemas are formatted using an extensible markup language" (see paragraph [0010] and [0032]-[0033]).

As per claims 13-17, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 1-6 and are similarly rejected.

As per claims 18-20, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 1-3 and are similarly rejected.
